- Test Results Archive

Instant Access to Test Results

Wait for nothing. View your test results as they occur. Did the test pass? Great. If not, we show you what's wrong. We provide three ways for you to navigate test results in a jukebox display that you can flip through just as you would CDs.

Event, Message, and Error Views

Debug quickly. Search test results by messages only, errors only or by value. You are never more than three clicks away from the details of your test results.

Integrated Search Capability

Avoid the haystack. Reach into huge, complex test results with pinpoint accuracy to grab just what you're interested in. Burst messages in a specific test case to see how it performs. Resolve errors by comparing results across multiple test runs. Mine test results to learn how your specific message operations performed. You decide.

Test Results Archive

Keep track of everything. Complete documentation of all test results and test detail means you never miss a step. Stay in compliance with new mandates for reporting and auditing of your IT systems.
